

# INTIMIDATOR™ 12XPC

## 12" Capacity Hand-Fed Chipper

The Intimidator 12XPC is for professionals focused on trimming, yet is rugged enough to chip 12" diameter material. It's particularly popular with rental companies, utilities and tree care companies because of its maneuverability and cost-effective performance. Its compact design makes the 12XPC easy to tow and position, and its feed rate of 120 feet per minute quickly converts large quantities of brush into dimensional chips. Gasoline and diesel engine options up to 89 horsepower will keep the crew busy feeding and Bandit's solid construction will provide years of dependable service.

### COMPACT CHIPPER, BIG APPETITE.

- **Large 17" wide chipper opening** easily processes large material
- **Powerful dual-wheel feed system** crushes and compresses limbs, reducing trimming time
- **Compact and maneuverable** with high production capacity is ideal for rental companies serving both homeowners and contractors

### Reduce Your Labor Costs

The powerful dual-wheel feed system consists of two spring tensioned 17" wide x 7-1/2" diameter feed wheels, mounted in Bandit's proven slide box system. With 1,687 pounds of pulling force from each feed wheel, the 12XPC effectively pulls trees and large limbs into the chipper. Material is folded and crushed with little-to-no extra trimming, repositioning or cutting larger pieces into shorter lengths. The sloping infeed tray makes it quicker and easier to load and slide brush, logs and trees into the feed system.

### Reduce Your Transportation Costs

No other hand-fed chipper throws harder than a Bandit. The proprietary designs of drum set-up, chipper transitions and discharge chutes aggressively throw material by minimizing chip resistance. A manual 360-degree swivel discharge with chip deflector fully loads chip boxes, reducing trips to the dump site. The throwing power also increases the chipping broadcast area for projects where chips are left on site.

### Produce A Marketable Chip

Bandit's synchronized feed system feeds material at the rate the chipper wants to chip it. Wood is never held from nor forced against the drum. This reduces wear to the drum, prolongs knife life, and produces a consistent, uniform chip that's far more marketable.

Bandit owners get paid for their chips while companies running other chippers often are forced to pay for chip disposal. Even with recycling requirements for materials increasing, Bandit chippers produce valuable chips used in biomass energy and mulch applications. Bandit chips are also used for erosion control on embankments and in erosion socks for construction projects.

# Intimidator™ 12XPC

12" capacity drum-style chipper

## Intimidator™ 12XPC Specifications

### ENGINES

**TOWABLE:**

- GM 89 HP Gas
  - Kohler, CAT & Perkins 74 HP T4 Final
- DIESEL ENGINE OPTIONS (EXPORT ONLY)**
- Kubota 84.5 HP T3
  - CAT 49.4 HP T4i

### UNDERCARRIAGES

**TOWABLE:**

- AXLE** - Single 6,000 lb. Torflex EZ-lube axle
- TIRES** - (2) 225/75R 15"

### MEASUREMENTS:

	<b>TOWABLE:</b>
Length:	16'
Width:	6' 6"
Height:	8' 1"
Weight:	4,900 lbs
Fuel Tank:	25 gal
Hyd. Tank:	12 gal

### OTHER SPECIFICATIONS:

Capacity:	12"
Throat Opening:	14-1/4" x 17"
Drum:	24" diameter x 18-3/4" wide (3/8" thick)
RPM:	1,530
Feed System:	Slide box
Adjustable Springs:	2 - 17"
Horizontal feed wheels:	17" x 7-1/2" diameter
Displacement (CID):	15.9
Hydraulic Motors:	2
Discharge:	Std. with manual crank swivel
Deflector:	3-Position Manual
Hitch:	2 Position, 2-1/2" Pintle
Frame:	3/16" x 2" x 4" main frame with a 1/4" x 3" x 4" tongue
Tongue Jack:	8,000 pound "Bulldog" tongue jack, adjustable for height with 15" travel capacity and stationary foot pad

## Safety Features

- Rope/Line Shear Device (standard)**  
 Provides an improved chance that rope or lines inadvertently entering the chipper may be cut.
- Last Chance Cables (standard)**  
 Stops/reverses the feed wheel when pulled in case of an emergency
- Operator Safety Control Bar (standard)**  
 Wraps around three sides of the infeed chute and controls the direction of the feed wheels.
- Wood Pusher Paddle (standard)**  
 Used to feed small wood debris into the chipper.
- Chipper Hood Pin w/Padlock (standard)**  
 Prevents unauthorized access to the disc or drum.
- Chipper Hood Engine Disable Plug (standard)**  
 Prevents engine from being started without the hood pin in place.
- Hydraulic Bottom Bump Bar (option)**  
 Stops feed wheels via mechanical connection when bumped, diverting hydraulic power away from the feed wheels.

## The Bandit Backbone™ Support

The Bandit Backbone is Bandit's commitment to customer service and support. It's always been a cornerstone of Bandit's philosophy, and today that backbone is stronger than ever. If you own a Bandit hand-fed chipper – regardless the age, hours, or warranty status – the Bandit Backbone is here to support you.

## We Are Here to Support You

There are nearly 200 dealer locations in the US and 61 international dealers to support you. They are factory trained. Plus we have an experienced parts and service department supporting you and our dealers.

## Extremely Easy to Service and Maintain

Bolt-in knives are easy to access and change through the chipper hood. The knives are reversible with two usable edges per sharpening. Knives can be sharpened up to five or six times before replacement. All grease points are easy to reach, and all other service areas are easy to access.

## Popular Options

### Gas or Diesel Engine Options

Bandit offers a wide variety of gas and diesel engine options to choose from.

### Knife Saver Option

The Intimidator 12XPC is available with a knife saver option.

## Standard & Custom Colors Available

Choose from six standard colors, or select a custom color to match your fleet.
