

# MODEL 200XP

## 12" Capacity Hand-Fed Chipper

The Model 200XP is our mid-range 12" disc-style chipper. This unit is slightly bigger than the Model 150XP, featuring a **45" wide infeed tray**. The 200XP is best suited for those tree services that specialize in utility line clearance due to its faster feed rate, allowing it to quickly dispose of a wide variety of material. It is also **highly maneuverable** and built using steel welded construction for durability as opposed to bolt-together techniques. A wide chipper opening along with powerful gas and diesel engine options make this unit a **real workhorse**.

### COMPACT AND POWERFUL.

- Impressive **14" x 17" chipper throat opening**
- Powerful **dual-wheel feed system**
- Available with **gas or diesel engine options** up to 122.5 horsepower

### Powerful Slide Box Feed System

The Model 200XP is equipped with two horizontal 17" wide by 7-1/2" diameter feed wheels mounted in Bandit's proven **Slide Box Feed System**. This system uses direct down pressure, making it easy to feed and chip large diameter branches, multiple stems and small trees. The **dual feed wheels** are powered by aggressive hydraulic motors generating not just adequate, exceptional force to **aggressively pull in and compress** limby material.

### High Velocity Discharge

Smooth transitions from the chipper housing to the discharge chute allow the Model 200XP to **throw harder and farther than competing machines**. With the Model 200XP, you'll load chip vans faster with more product per load.

### Rugged Components

Heavy-duty components help ensure long life and trouble-free operation, even when chipping tough material. The chipper disc, housing and shaft are built using the highest quality steel to stand up to the toughest material.

### Custom Features & Options

You can customize your Model 200XP Bandit® chipper to meet your specific needs. We provide the best features and options such as **winches, reversing auto-feed**, numerous **engine configurations, special colors** and more, allowing you to set up your chipper to meet your needs.
