

# MODEL 250XP

## 12" Capacity Hand-Fed Chipper

The Model 250XP 12" capacity disc-style chipper is **a legend in its own time**. Used by tree care professionals around the world for more than 20 years, the Model 250XP is the 12" wood chipper that all others are compared to. This machine features a **very wide throat opening** to easily handle large limby material, all while remaining compact and easily towable.

### COMPACT AND POWERFUL.

- Impressive **12-½" x 19" chipper throat opening**
- Powerful **dual-wheel feed system**
- Available with **gas or diesel engine options** up to 147 horsepower

### Powerful Slide Box Feed System

The Model 250XP is equipped with two horizontal 19-½" wide by 10-5/8" diameter feed wheels mounted in Bandit's proven **Slide Box Feed System**. This system uses direct down pressure, making it easy to feed and chip large diameter branches, multiple stems and small trees. The **dual feed wheels** are powered by aggressive hydraulic motors generating not just adequate, but excessive force to **aggressively pull in and compress** limby material.

### High Velocity Discharge

Smooth transitions from the chipper housing to the discharge chute allow the Model 250XP to **throw harder and farther than competing machines**. With the Model 250XP, you'll load a chip van faster with more product per load.

### Rugged Components

Heavy-duty components help ensure **long life and trouble-free operation**, even when chipping tough materials. The chipper disc, housing and shaft are so rugged that very rarely do they need to be replaced.

### Custom Features & Options

You can customize your Model 250XP Bandit® chipper to meet your specific needs. We provide the best features and options such as **winch**, **reversing auto-feed**, numerous **engine configurations**, **special colors** and more, allowing you to set up your chipper to meet your requirements.

## MANY WAYS TO CONFIGURE YOUR MODEL 250XP

### Self-Propelled

Available with **rubber track undercarriage**, the Model 250XP can be taken right to the trees.

### Winch Option

For additional pulling power, add a winch to the 250XP and bring material to the infeed easier.

### Knife Saver Option

This **hand-held knife sharpener** touches up knives in the chipper.
