

# MODEL 255XP

## 15" Capacity Hand-Fed Chipper

Bandit's 15" disc-style Model 255XP has the power and performance of a whole tree chipper with the size and **maneuverability** of a brush chipper. This dependable unit can process trees and limbs up to 15" in diameter with **minimal trimming** required. When equipped with the popular self-propelled track undercarriage, the Model 255XP becomes an ideal sidekick for site clearance projects.

### GREATER CAPACITY, GREATER POWER.

- **Durable chipper disc** resists damage, limiting the need for replacement
- Chipping angle, cutting action and synchronized feed **yields uniform chips**
- Features a larger chipping capacity while retaining a size that is **easy to tow**

### Power Options

The engine or power unit provides all of the power to run the chipper and the hydraulic functions of the chipper. Engine options for the Model 255XP are available from **97- to 215-horsepower**.

### Powerful Dual Feed Wheels

Bandit's Model 255XP is equipped with two horizontal 25" wide x 10-5/8" diameter hydraulic feed wheels powered by large hydraulic motors. The powerful dual wheel feed system makes it easy to chip large diameter material and multiple stems. It also makes it **easy to feed limby material**, reducing the need for trimming. Because the wheels are horizontal, gravity helps spread out the material, maximizing the surface area of the feed wheels. All Bandit® chippers have the widest possible infeed hopper openings for disc or drum diameter and length. The Model 255XP Brush Bandit® chippers have a **15" high x 25" wide infeed throat opening**.

### Patented Infeed Chute Lift Assists

The heavy-duty **64" wide hopper** on the Model 255XP has a standard spring loaded lift assist, making it easy to raise and lower the infeed hopper of the chipper. A heavy-duty, **fixed position weld-on infeed tray** is optional.

### Time-Saving Options

There are options, such as loaders and winches, that make it easy to feed larger materials into the chipper. Being able to feed heavier pieces into the chipper eliminates the need for, and cost of, cutting the material to short lengths to be hand-fed.

### Torflex EZ-Lube Axles

The Model 255XP with **4-cylinder engine** is equipped with an 10,000 lb single axle with 215/75R 17.5, 16-ply tires.

The Model 255XP with **6-cylinder engine** is equipped with tandem 7,000 lb axles with ST235/80R16 10 ply tires.
