

MODEL 75XP

7" Capacity Hand-Fed Chipper

At Bandit Industries, there's no such thing as "entry level." Our most compact disc-style chippers are given the same attention to detail and pack the same heavy-duty construction as their bigger brothers. These rugged, compact, hydraulic-feed disc-style chippers are the primary chippers for many tree and landscape contractors, and they make great rental machines!

COMPACT & POWERFUL

- Easily converts 7" trees, brush, limbs and prunings into **dimensional chips**
- **Lightweight, durable** and **easily maneuverable**
- **Popular in rental markets**

Rugged & Powerful Enough To Be Your Primary Chipper

Tree care and landscape contractors, municipalities, parks and recreation departments, and rental companies all rely on the 75XP to process a steady diet of trees, brush and prunings up to 7" diameter. The larger chipper disc, shaft and components make it the most reliable 7" capacity chipper available. Plus the large diameter feed wheel with bearing support on both ends will last longer and require less maintenance than any other 7" chipper.

Chip Rougher Material With Less Trimming

The 12" x 7" opening is twice the size of most competitive chippers. This allows the 75XP to process multiple pieces simultaneously, as well as forked limbs that will not fit through competitive chippers without trimming. The large diameter feed wheel powered by a 25 cubic-inch displacement hydraulic motor folds limbs and branches into the chipper. Powerful engine options are available with gas and diesel engines available from 25 to 49.1 horsepower.

Easy On The Operator

The sloped in feed tray makes it easy to slide material to the feed system. The large chipper opening allows material to flow smoothly into the chipper while reducing trimming. Numerous safety items are included. See Bandit's website to see all of the safety features of this chipper.

Compact Chipper That Is Easy To Get Into Tight Spots

This Model 75XP is easy to tow and maneuver. Depending on the options selected, it weighs approximately 3,000 lbs.

Load Chip Trailers To The Max

The amazing discharge velocity and directional discharge control pack chip trailers to the max, reducing trips to the dump site. Unique chip throwers and nonrestrictive transitions through the discharge chute create the throwing velocity, while a 360° swivel discharge and a directional discharge flipper give you total control over the direction of chips.
